

WELCOME NEW FACULTY: HARBORVIEW

Duncan Reid MD, MS

I am originally from Long Beach, CA and have taken a circuitous path before landing in Seattle, a city that is now home. I enjoy caring for the diverse population of the city and seek to be an advocate for those who have been marginalized by circumstance.

My original career path was in the fields of herpetology and ichthyology, and I am known to include zoological teaching on rounds. I am also fascinated by the history and geology of the Northwest. Recently, my wife, Parimal, and pet Snake, Freida, welcomed our new baby boy, Kai.

Anamika Goenka, MD

I have been a hospitalist for 13 years and blessed to have worked at 3 amazing institutions: Grand View Hospital which helped make me a clinician, Lehigh Valley Health Network which enhanced my administrative skills, and Parkland, UTSW which shaped me into an educator. Now I am looking forward to learning at UW and growing both professionally and personally. I have heard the term *burnout* in hospital medicine and am blessed to say this is not true for me. I feel this branch is one of the most satisfying with excellent work-life balance. I have a strong interest in medical IT to improve communication and thus improve quality in healthcare. I was blessed to work as a lead on the secure text application, Vocera Engage, at Parkland and hoping to adapt that technology at UW. I have a 12 year old son and live with my family in Bellevue. I love to cook and am having a great time experimenting with baking.

Kay Johnson, MD, MPH

Career Update

Kay recently accepted a position as an associate editor of the Journal of General Internal Medicine. She tells MD Aware that this position helps the journal while giving her a better idea about how editorial decisions are made, and will theoretically keep her in touch with the cutting edge areas of her research interests.

Her step in the editorial process is after a paper is submitted to JGIM and one of the editors-in chiefs reads it, they forward it to Kay or one of the other associate editors. Kay can then either veto the manuscript or forward it to potential reviewers. Once there are enough reviewers' comments she makes the decision on whether it gets published, needs revisions or is rejected. To learn more, email Kay at kay.johnson2@va.gov

WELCOME NEW FACULTY: HMC continued

Kimberly McDonald, MD

transition of care. In my spare time I enjoy traveling, hiking, and hanging out with my family.

I am originally from Vancouver, British Columbia, and completed my residency at the University of Connecticut. I then worked at a private community teaching hospital affiliated with UConn for over 3 years before relocating back to the West Coast with my husband Ryan Joyce (who is now a radiologist here at HMC!). I am extremely excited to have recently joined the hospitalist group at HMC. I am also very humbled to take on the role of Director of Hospital Medicine at Harborview. My interests include patient safety, quality improvement, and

transition of care. In my spare time I enjoy traveling, hiking, and hanging out with my family.

Rashmi Khanna, MD

2.5 years and 6 months old. I also enjoy cooking and traveling.

I am excited to join the UW/Harborview family as a hospitalist this academic year. I completed my medical school in India and after worked as house staff in India and Singapore prior to starting residency at Cleveland Clinic-Fairview Hospital where I was chief resident during my final year of residency. I went on to become a hospitalist at the University of Iowa and then Cambridge Health Alliance, Boston. In my free time, I spend time with my two little kids who are 2.5 years and 6 months old. I also enjoy cooking and traveling.

Eric Soriano, MD

I am a Seattle native, excited to move back home after 11 years in the northeast for training. As a high school student, I volunteered at HMC when I was first thinking about a career in medicine and am thrilled to be coming full circle to join the HMC faculty! I am interested in QI, point-of-care ultrasound, medical education, and advocacy for underserved patients. I am an avid runner and am always planning my next marathon race. I also enjoy snowboarding, board games, and can often be found singing at karaoke bars or around the office.

Evan Paul, MD

Career Updates

Evan Paul will be working with the VA and DOD to remake an older sepsis advisor based on evidence based clinical practice that will include tools to help make it more likely to meet JC sepsis core measures for severe sepsis and septic shock.

WELCOME NEW FACULTY: HMC continued

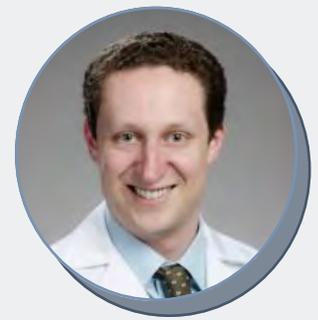

Binish Qureshi, MD

I had the privilege of attending one of the best medical schools in Pakistan. I moved to the United States and lived in Seattle for several years before starting a residency in St Louis. I feel extremely privileged to be a part of hospital medicine at the University of Washington. Practicing at the Harborview Medical Center aligns with my passion and extensive experience working with an underserved population. I enjoy teaching and mentoring and believe this is a symbiotic relationship. Some of the best learning occurs whilst teaching and I strive to be a mentor for my medical students and residents. Many people may not know that I have a deep interest in learning theoretical physics second only to my love for medicine. I enjoy spending time with my husband and playing with my toddler when I get the chance.

Peter Bulger, MD

I grew up in Montana and did med school and residency at UW before serving as inpatient chief resident at Harborview last year. In July I'll start ID fellowship in the UW program and though I'm very excited about it, I'll be sad to leave the HMC hospitalist job, as it has been great so far. In my spare time I like to get outdoors, but lately most of my time has been taken up by my 6-month-old son, Charlie.

Congratulations

Congratulations to Eric LaMotte for receiving the Expert Teacher Award from DGIM. This award provides protected time for one year for junior faculty members to hone their teaching skills while working with senior faculty mentors. Eric will focus on refining his teaching of bedside physical exam skills with residents and students.
